

LEATHER STYLE BOLERO

remaking a leather lacket into a
hardcore bolero

a >SELF_PASSAGE< method

© copyleft by >wronsov< Oct 2007

1. take an old long leather jacket.

2. cut it in half above the waist.

3. make seams to fix lining.

4. unstitch outer seam along the collar edge
and put in the waistline seam into the open
collar edge.

5. make pleats to adjust length.

6. so the extended collar fits.

7. and the pleats are highly visible from inside.
stitch together the collar seam again.

8. so the whole new thing looks something
like this.

9. strap up, fight those models face-to-face.
